Email: shipwheelcattle@itstriangle.com • www.ShipwheelCattle.com

We would like to welcome you to our upcoming 7th Annual Production sale on December 9th, 2015. As with every year, a huge thank you goes out to our customers and supporters for your continued faith in our program. It is our goal to continue raising the type of cattle that will enable you, our customer, to be prospering in the cow business generations from now. 2015 marks 70 years of my family raising Black Angus cattle. It is our goal to be here in another 70 doing the same.

We are very excited and proud to offer 80, muscled up, coming 2's this year. These guys represent the top 50% of our 2014 calf crop and truly believe that they are our best ever. Fourteen embryo sons of one of the very best cows that we have had the opportunity to raise will be offered for sale. Every bull selling was bred, born and raised on our outfit. We take great pride in developing the bulls at home. We know their every move which helps us identify the individuals that will ultimately do the best

job of helping our customers succeed. The herd sires that we seek out to use have to excel at nearly every trait. Hoof structure, fertility, soundness, disposition and mothering ability are some traits that are very important to us.

We will also be offering 40 bred heifers that come right out of the heart of our program. They were ultra-sounded for calf age and sex. Many are carrying A.I calves by some of the industry's top sires and others were naturally bred by some of the very best bulls in this sale.

2015 has had its share of ups and downs with the market and moisture. Prices are still good and are projected to be favorable into the years to come. Moisture has hit some dry areas this fall and hopefully everyone will be sitting good going into 2016. The demand for CAB continues to be a bright spot in the beef industry.

Every bull selling has been tested for i50K this year with the exception of Lot 1 and Lot 8. They had the original 50K test done prior to i50K being available. i50K is a lower cost genomic and parentage test that reportedly has the same accuracy as the original 50K test with quicker turnaround times. The 50K database is acquiring thousands more cattle with every year which will only help with accuracies and with your selection criteria. Larry Gran from Zoetis will be available sale day if you would like to visit with him. Reports on the bulls will be available sale day or earlier upon request.

255 was the high selling bull from Spickler's in North Dakota in 2013. He is an attractive, good footed herd sire that has proven himself to be an excellent breeding bull. 255 sires a little less frame and more calving ease than the old Chisum bull. The dam of 255 is an excellent uddered Chinook daughter that descends from a long line of productive cows. The females from 255 should be outstanding. *Co-owned with Heiken Angus and Spickler Ranch. Semen available.*

Vance was one of our high selling bulls in 2013 going to MY Angus and Gordon and Sheila Young. He is a medium framed, gentle bull with nice muscle expression that has reportedly done an excellent job of breeding. Nearly 100 calves by Vance averaged 71 pounds at birth and weaned off heavy. Although we only have 2 sons to offer, they are both features of this sale. **Semen available.**

Freestyle was a selection of ours several years ago from Black Pine Farm. He was selected for his outstanding hoof structure, excellent profile, gentle disposition and that he was raised by the best cow on their place. He has served as a cleanup bull for many years now in all types of conditions and is still going strong. His broody daughters are excellent uddered and the right size.

5 Sons Sell.

BRED HEIFERS SELL FIRST

These heifers come right out of the heart of our cowherd. Many are half-sisters to the bulls selling in this sale, sired by some of the industry's top A.I. sires as well as our top Shipwheel herd sires. They winter on grass pastures and hay meadows with a lot of room to travel, hay and SweetPro blocks. They should weigh approximately 1000lbs. by sale day and have had PregGaurd Gold FP10, Scourgaurd 4KC, Maxi/Guard pinkeye vaccine, and Dectomax Pour-on. The heifers will be grouped in Lots of five. Some of the heifers will be carrying A.I. Calves due approximately March 10. The remaining will be naturally bred heifers, due in April, carrying calves by Lot 1, 5, & 33 bulls selling in this sale. Highest bidder has the option of taking minimum of 5 up to 40. Group information will be available sale day.

Heifers will be selling first.

- Recommended for heifers or cows.
- The lead off bull of four Capitalist full brothers. He is a dandy that we have used for natural service.
- Full brothers sell as Lots 17, 32, 65.

Congrats to Nate Hill on his Reserve Champion Shipwheel Steer at the 2015 Broadwater County Fair.

Congrats to Kailey Kleinjan on her Grand Champion Yearling Heifer and Over-all Angus award on her Shipwheel progeny project at the 2015 Blaine County Fair.

Congrats to Laine Hill on her Shipwheel Steer sired by S Chisum 255 at the 2015 Broadwater County Fair.

- Dam is a descendant of the Chloe's. Many generations of outstanding cows.

BULL DEVELOPMENT AT SHIPWHEEL CATTLE CO.

Prior to calving, our cows are expected to graze winter pasture with only SweetPro blocks usually well into February before seeing any hay. Our cows are range calved in April and May while only being checked twice a day. The pairs summer primarily in some of our higher, rougher pastures with the calves never seeing any creep feed. A full round of shots are given at our June/July brandings as well as preconditioning in September/October. The calves are then fence line weaned in early November on our hay meadows and SweetPro blocks. After grazing for 30 days, the bulls are then hauled into our grow yard, where they remain until May. While in the grow yard, a 2.5 to 3 lb. gain is targeted with a roughage based diet consisting of grass/alfalfa hay, silage, a mix of oats, peas, corn and a customized vitamin mineral pack. We are constantly evaluating them and enjoy watching them slowly progress into structurally sound breeding bulls. The bulls are then hauled to summer pasture where they are expected to travel and thrive in rough terrain. In September, the bulls are brought back into the grow yard and fed a similar diet to post weaning. The manner in which we develop our bulls enables them to express their genetics. The bulls are broke to horses, dogs and a hot wire.

“For the past three years, we have been developing our replacement heifers and supplementing our cows post calving on SweetPro tubs and Redmond salt with great success. In addition to the hay savings we have experienced, the general health and fertility has also seemed to improve.

I am a real believer in the benefits of the added enzymes and probiotics contained in the SweetPro tubs.”

– **Jason Harrison, Harrison Angus Ranch,
Boyd, MT, High-selling bull,
2012 & 2013 Midland Bull Test**

“We were nothing less than impressed with the results of our replacement heifers last winter on the Sweet Pro blocks. With only grass hay, Kafkandi blocks and Redmond salt, the heifers came into spring in perfect condition, cycling like crazy. Health throughout the winter was excellent and their performance was right on target. We actually witnessed a reduction

in the consumption of hay which significantly reduced our input costs. I think that the chelated minerals and the digestive aids which help the animals utilize lower quality forages are very beneficial. Feeding the tubs every ten days is very convenient and they are also very easy to handle. Having access to a product that has all of these benefits is very exciting in today's world of agriculture. At this point, I'm very comfortable recommending the Sweet Pro, Redmond salt combination. It sure has done the job for us.”

Montana was our top selling selection of TC Ranch from Nebraska and Genex, in the 2013 sale. He is a bigger framed, long bodied bull with an outcross pedigree. His first set of calves here are outstanding. TC Ranch claims that the 49 Montana sons selling in their upcoming sale are the best they have. Look for many Montana sons in our 2016 sale as well as embryo sons by Montana's dam and Resource. Semen available through Genex.

One of the most exciting bulls to sell in the Spring of 2015. He was the \$18,000 second high selling bull from Myers Angus Farm at the Boyd Beef Cattle Bull sale in KY. Keystone combines calving ease, growth and carcass traits all with a moderate Milk and high Scrotal Circumference EPD's. This son of Connealy Capitalist has the potential to make excellent females combining maternal greats Hoover Dam and Hyline Right Time 338 on the bottom side of his pedigree. His dam, Myers Queen M180, is deep ribbed and easy fleshing with a near picture perfect udder. Keystone exhibits near flawless phenotype and has exceptional feet and leg structure. Owned with Myers Angus Farm. Semen available through ORigen.

Dr J is an exciting young herd sire that we were fortunate to buy interest in last year. He is sired by our co-high selling bull in 2011 that is still working for Black Pine Farm. He is a very gentle, massive bull that carries a big quarter and thick top on and excellent set of feet and legs. Dr J is an intelligent bull that actually gains weight while breeding, both here and at Black Pine Farm in 2014 and 2015. Look for his first sons in 2016. 14 embryo sons of his maternal grand dam sell in this sale. Owned with 3-B Ranch and Black Pine Farm. Semen available.

2517 was a top selling selection by R. Math Farms in our 2013 sale. He was a performance and phenotypic standout with excellent feet and disposition. His dam has proven herself to be one of our most influential cows. The individual 50K on 2517 was incredible, which apparently is a testament to his calves. They are born with moderate birth weights and absolutely explode. His first set of calves, have just been weaned and are true standouts. Look for sons in our 2016 sale.
